

KENT JOHN MACALAM

Data Science Student | Python, SQL, Excel, Power BI | Data Cleaning and Reporting

Cagayan de Oro, Philippines | macalam.kentjohn@gmail.com | GitHub: github.com/Kent0625 | Phone: +63 [add number]

PROFESSIONAL SUMMARY

Data Science student with project-based experience in Python, SQL, Excel, Power BI, data cleaning, exploratory data analysis, dashboard reporting, and introductory machine learning. Seeking a part-time, internship, or project-based role supporting reports, data preparation, dashboards, research data, and analytics workflows.

CORE SKILLS

Programming: Python, Pandas, NumPy, scikit-learn	Data & BI: SQL, PostgreSQL, Excel, Power BI, dashboards	Analytics: EDA, data cleaning, feature engineering, KPI reporting
ML Basics: classification, regression, model comparison, evaluation metrics	Tools: Jupyter Notebook, Git/GitHub, FastAPI basics	Work Style: documentation, presentation, detail-oriented analysis

SELECTED ACADEMIC PROJECTS

Legislative Bill Outcome Prediction DSS

- Built a machine-learning workflow for legislative bill status prediction using data cleaning, feature engineering, TF-IDF on subjects, model comparison, confusion matrix analysis, and KPI-focused interpretation.

E-Eye AI Refractive Screening Capstone

- Contributed to an AI vision-screening methodology using image-processing concepts, CNN-MLP late-fusion architecture, temporal feature aggregation, continuous regression outputs, and embedded deployment planning.

Cloud E-Commerce Analytics Project

- Designed a full-stack analytics concept with FastAPI, PostgreSQL transactional database, reporting database, ETL/cron workflow, and dashboard KPIs for sales, revenue, products, and customers.

Coffee-Farmer Income Modeling Study

- Explored statistical modeling and bootstrap-based stability analysis for synthetic Bukidnon coffee-farmer income data using structured predictors and uncertainty-focused interpretation.

EDUCATION

Bachelor's Degree in Data Science - University of Science and Technology of Southern Philippines (USTP)

- Relevant coursework: Data Visualization and Storytelling, Theory of Databases, Computer Networking, Optimization Theory, Calculus 2.

TARGET ROLES

Data Analyst Intern | Reporting Assistant | Excel/Power BI Assistant | Research Assistant | Junior Business Analyst | Data Encoder Analyst
